

# Curriculum Vitae

Andrew Martin Pownuk

## 1 Contact Information

Andrew Martin Pownuk  
Department of Mathematical Sciences  
The University of Texas at El Paso  
500 West University Avenue  
El Paso, Texas 79968-0514, USA

Bell Hall 144  
Office phone: 915 747 6773, Fax: 915 747 6502  
E-mail: [ampownuk@utep.edu](mailto:ampownuk@utep.edu)  
URL: <http://andrew.pownuk.com>

## 2 Education

- 2021 – Machine Learning, An online non-credit course authorized by Stanford University and offered through Coursera, Instructor Andrew Ng.
- 2015-2017 – Ph.D. degree in Computational Science, Computational Science Ph.D. Program, The University of Texas at El Paso, El Paso, Texas, USA. Dissertation title: Combining Interval and Probabilistic Uncertainty in Engineering Applications. Supervisor: Prof. Vladik Kreinovich.
- 2015-2016 – Master’s degree in Computational Science, Computational Science Program, The University of Texas at El Paso, El Paso, Texas, USA. Thesis title: Combining Interval and Probabilistic Uncertainty in Engineering Applications. Supervisor: Prof. Vladik Kreinovich.
- 2013-2014 – Master’s degree in Mathematics, Department of Mathematical Sciences, The University of Texas at El Paso, El Paso, Texas, USA. Thesis title: Fast Algorithm for Finding Lattice Subspaces in  $\mathbb{R}^n$  and its Implementation. Supervisor: Prof. Piotr Wojciechowski.
- 1995-2001 – Ph.D. degree, Department of Civil Engineering, Silesian University of Technology in Gliwice, Poland. Dissertation title: Application of Fuzzy Sets Theory to Assessment of Reliability of Civil Engineering Structures. Supervisor: Prof. Jerzy Skrzypczyk.

- 1997-1998 – Postgraduate Diploma (PGDip) in Computer Science, Speciality: Computer Networks and Databases, Department of Automatic Control, Electronics and Computer Science, Silesian University of Technology in Gliwice, Poland. Thesis title: Web Applications for Teaching of the Finite Element Method. Supervisor: Prof. Wojciech Mielczarek.
- 1990-1995 – M.S./B.S. degree and Engineering degree, Applied Mechanics, Department of Applied Mathematics, Silesian University of Technology, Gliwice, Poland. Diploma with honorable mention. Thesis title: Variational Equations in the Theory of Torsion of Prismatic Bars with Numerical Analysis. Supervisor: Prof. Szczepan Borkowski.

### 3 Work Experience

#### 3.1 Research and Teaching

- 2006-Present – Lecturer, Department of Mathematical Sciences, The University of Texas at El Paso, El Paso, Texas, USA.
- 1995-2010 – Institute of Theoretical Mechanics, Department of Civil Engineering, Silesian University of Technology in Gliwice, Poland.
  - 1995-2001 – Lecturer and Ph.D. Student
  - 2001-2010 – Assistant Professor (2006-2010 - sabbatical leave)

#### 3.2 Postdoctoral Positions

- 2020 - Summer Faculty Research Fellowship at U.S. Army CCDC Army Research Laboratory, Adelphi, MD., Machine Learning Based Optimization, Supervisor: Jade Freeman.
- 2006 – Postdoctoral Position (Researcher), Bergen Language Design Laboratory (BLDL), Department of Computer Science, The University of Bergen, Bergen, Norway. Project: SAGA - Scientific Computing with Algebraic and Generative Abstractions. Supervisor: Prof. Magne Haveraaen.
- 2003 – Postdoctoral Position (Researcher), Department of Mathematics, Faculty of Natural Sciences and Mathematics, University of Vienna, Vienna, Austria. COCONUT Project - COntinuous COntstraints - Updating the Technology. Supervisor: Prof. Arnold Neumaier.
- 2002 – Research Engineer, Chevron Corporation, San Ramon, California, USA.

## 4 Supplementary Education

- 09.12.2019 – QPR Gatekeeper Certificate, QPR Suicide Prevention Gatekeeper Program, University of Texas at El Paso.
- 2018-2019 – Effective Teaching Practices, Association of College and University Educators (ACUE), ACUE-17630296.
- May 22-26, 2017 – Conference Board of the Mathematical Sciences (CBMS), Conference on Sparse Approximation and Signal Recovery Algorithms, Las Cruces, New Mexico. Principal Lecturer, Anna C. Gilbert.
- 1999 (July) – Brno University of Technology, Czech Republic, Central European Exchange Program for University Studies (CEPUS). The stochastic finite element method and the theory of reliability.
- 1995-1999 – British Council, School of English Language.
- 1993-1995 – Course for teachers at the Research Center and Improvement of Didactics, Gliwice, Poland.
- 1994 (July-August) – Student Internship, CMG KOMAG, Mining Mechanization Center, Gliwice, Poland. Applications of the engineering software (PAFEC FEM) for the design of mining machines.

## 5 Community Service

- 2019 – El Paso Chopin Music Festival Committee.

## 6 Awards

- 2018 – 2018 NAFIPS Best Thesis Award.
- 2017 – Academic and Research Excellence Graduate Student in Computational Science, the University of Texas at El Paso, El Paso, Texas, USA.
- 2014 – Academic and Research Excellence Graduate Student in Mathematics, the University of Texas at El Paso, El Paso, Texas, USA.
- 2000 – Award for Scientific Achievements, Silesian University of Technology, Gliwice, Poland.
- 1995 – Master's thesis with honorable mention.

## 7 Grants

- 2012 – Principal Investigator – Project for Chevron Oil Company in Houston, Texas.
- 2006 – Participant – Scientific Computing with Algebraic and Generative Abstractions. University of Bergen, Bergen, Norway.
- 2003-2004 – Participant – Continuous Constraints - Updating the Technology. Vienna University, Vienna, Austria.
- 1998-2001 – Participant – Interval and Qualitative Methods of Modeling Uncertainty in Physical Systems. Silesian University of Technology, Gliwice, Poland.
- 1996-1997 – Participant – Application of Boundary Element Method in Some Problems of Computational Mechanics. Silesian University of Technology, Gliwice, Poland.

## 8 Book

1. A. Pownuk and V. Kreinovich, *Combining Interval, Probabilistic, and Other Types of Uncertainty in Engineering Applications*, Springer 2018.

## 9 Book Chapters

1. P. Melin, O. Castillo, A. Pownuk, O. Kosheleva, and V. Kreinovich, How to Gauge the Accuracy of Fuzzy Control Recommendations: A Simple Idea, In: P. Melin, O. Castillo, J. Kacprzyk, M. Reformat, and W. Melek (eds.), *Fuzzy Logic in Intelligent System Design: Theory and Applications*, Springer Verlag, Cham, Switzerland, 2018, pp. 287-292.
2. A. Pownuk, V. Kreinovich, and S. Sriboonchitta, Fuzzy Data Processing Beyond Min t-Norm, In: C. Berger-Vachon, A. Maria Gil Lafuente, J. Kacprzyk, Y. Kondratenko, J. M. Merigo Lindahl, and C. Morabito (eds.), *Complex Systems: Solutions and Challenges in Economics, Management, and Engineering*, 237-250, Springer 2018.
3. A. Pownuk and V. Kreinovich, (Hypothetical) negative probabilities can speed up uncertainty propagation algorithms, In: A. E. Hassanien, M. Elhoseny, A. Farouk, and J. Kacprzyk (eds.), *Quantum Computing: an Environment for Intelligent Large Scale Real Application*, 251-271, Springer 2018.
4. V. Kreinovich, A. Pownuk, and O. Kosheleva, Combining interval and probabilistic uncertainty: What is computable?, in: P. Pardalos, A. Zhigljavsky, and J. Zilinskas (eds.), *Advances in Stochastic and Deterministic Global Optimization*, 13-32, Springer, Cham, Switzerland 2016.

5. M. Ceberio, V. Kreinovich, A. Pownuk, and B. Bede, From interval computations to constraint-related set computations: towards faster estimation of statistics and ODEs under interval, p-box, and fuzzy uncertainty, in: JingTao Yao (ed.), *Novel Developments in Granular Computing: Applications for Advanced Human Reasoning and Soft Computation*, 131-147, IGI Global 2010.
6. A. Pownuk, Numerical solutions of fuzzy partial differential equation and its application in computational mechanics, in: M. Nikraves, L. Zadeh and V. Korotkikh, (eds.), *Fuzzy Partial Differential Equations and Relational Equations: Reservoir Characterization and Modeling*, 308-347, Springer 2004.

## 10 Textbook

1. J. Jedrzejczyk-Kubik, A. Pownuk, and J. Skrzypczyk, *Selected Mathematical Problems with Exercises* (in Polish), Publishing House of the Silesian University of Technology, ISBN 978-83-7335-578-1, Gliwice, Poland, 2010.

## 11 Journal Papers

1. A. Pownuk and V. Kreinovich, Towards Decision Making under Interval Uncertainty, *Journal of Uncertain Systems*, 12, 3, 200-207, 2018.
2. A. Pownuk and V. Kreinovich, How Interval Measurement Uncertainty Affects the Results of Data Processing: A Calculus-Based Approach to Computing the Range of a Box, *Mathematical Structures and Modeling*, 46, 118-124, 2018.
3. A. Pownuk, O. Kosheleva, and V. Kreinovich, Towards Decision Making under General Uncertainty, *Mathematical Structures and Modeling*, 44, 109-119, 2017.
4. A. Pownuk and V. Kreinovich, Why linear interpolation?, *Mathematical Structures and Modeling*, 43, 43-49, 2017.
5. A. Pownuk and V. Kreinovich, Why Mixture of Probability Distributions?, *International Journal of Intelligent Technologies and Applied Statistics (IJITAS)*, 10(2), 41-45, 2017.
6. V. Kreinovich, O. Kosheleva, A. Pownuk, and R. Romero, How to take into account model inaccuracy when estimating the uncertainty of the result of data processing, *ASCE-ASME Journal of Risk and Uncertainty in Engineering Systems, Part B: Mechanical Engineering*, 3(1), Paper No. 011002, 2017.

7. A. Pownuk, P. Barragan Olague, and V. Kreinovich, Why Compaction Meter Value (CMV) Is a Good Measure of Pavement Stiffness: Towards a Possible Theoretical Explanation, *Mathematical Structures and Modeling*, 40, 48-54, 2016.
8. A. Pownuk, L. Longpre, and V. Kreinovich, Checking monotonicity is NP-Hard even for cubic polynomials, *Reliable Computing*, 18, 90-96, 2013.
9. M.V. Rama Rao, A. Pownuk, M. De Munck, and D. Moens, Fuzzy analysis of the moment of resistance of a doubly reinforced concrete beam with uncertain structural parameters, *Life Cycle Reliability and Safety Engineering*, 2(1), 9-20, 2013.
10. M.V. Rama Rao, A. Pownuk, S. Vandewalle, and D. Moens, Transient response of structures with uncertain structural parameters. *Journal of Structural Safety*, 32(6), 449-460, 2010.
11. A. Pownuk, N. Kumar, and G. Ramunigari, Application of order-preserving functions to the modeling of computational mechanics problems with uncertainty, *Reliable Computing*, 15, 132-143, 2011.
12. A. Pownuk, Mathematical aspects of grading student's homework in online web applications, *Journal of Uncertain Systems*, 5(2), 141-153, 2011.
13. M. V. Rama Rao, A. Pownuk, and I. Skalna, Stress analysis of a singly reinforced concrete beam with uncertain structural parameters, *International Journal of Reliability and Safety*, 3(1/2/3), 307-329, 2009.
14. I. Skalna and A. Pownuk, Global optimization method for computing interval hull solution for parametric linear systems, *International Journal of Reliability and Safety*, 3(1/2/3), 235-245, 2009.
15. I. Skalna, M.V. Rama Rao, and A. Pownuk, Systems of fuzzy equations in structural mechanics, *Journal of Computational and Applied Mathematics*, 218(1), 149-156, 2008.
16. A. Neumaier and A. Pownuk, Linear Systems with Large Uncertainties, with Applications to Truss Structures, *Journal of Reliable Computing*, 13(2), 149-172, 2007.
17. A. Pownuk, Optimization of mechanical structures using interval analysis, *Computer Assisted Mechanics and Engineering Sciences*, 7(4), 699-705, 2000.
18. M. Jasinski and A. Pownuk, Modeling of heat transfer in biological tissue by interval FEM, *Computer Assisted Mechanics and Engineering Sciences*, 7(4), 551-558, 2000.
19. Z. Kulpa, A. Pownuk, and I. Skalna, Analysis of linear mechanical structures with uncertainties by means of interval methods, *Computer Assisted Mechanics and Engineering Sciences*, 5, 443-477, 1998.

## 12 Peer-reviewed Papers Published in the Research Bulletins

1. A. Pownuk, Interval methods for solution of nonlinear equations of structural mechanics (in Polish), *Research Bulletin of the Institute of Applied Mechanics*, 9, Silesian University of Technology, Gliwice, Poland, 321-236, 1999.
2. A. Pownuk, Modeling of uncertain parameters in mechanical structures by using the Interval Mathematics (in Polish), *Research Bulletin of the Institute of Applied Mechanics*, 9, Silesian University of Technology, Gliwice, Poland, 225-230, 1999.
3. A. Pownuk, Application of regular interval Jacobian matrices for calculation of extreme value of mechanical quantities. Part I - theoretical foundations (in Polish), *Scientific Bulletin of the Silesian University of Technology, Civil Engineering Series*, 86, 167-174, 1999.
4. A. Pownuk, Application of regular interval Jacobian matrices for calculation of extreme value of mechanical quantities. Part II - numerical examples (in Polish), *Scientific Bulletin of the Silesian University of Technology, Civil Engineering Series*, 86, 175-182, 1999.
5. A. Pownuk, Interval methods for solution of the equation of structural mechanics (in Polish), *Scientific Bulletin of the Silesian University of Technology, Civil Engineering Series*, 85, 61-74, 1998.
6. J. Skrzypczyk and A. Pownuk, On some method of estimation of upper value of mechanical quantities under interval uncertainty (in Polish), *Scientific Bulletin of the Institute of Applied Mechanics*, 7, Silesian University of Technology, Gliwice, Poland, 323-328, 1998.
7. J. Skrzypczyk and A. Pownuk, Methods for solution of the interval system of equations in the fuzzy mechanics (in Polish), *Scientific Bulletin of the Institute of Applied Mechanics*, 4, Silesian University of Technology, Gliwice, Poland, 323-328, 1997.

## 13 Papers in Conference Proceedings

1. V. Kreinovich, A. M. Pownuk, O. M. Kosheleva, and A. Belina, When is Propagation of Interval and Fuzzy Uncertainty Feasible? *Proceedings of the 8th International Workshop on Reliable Engineering Computing REC'2018*, Liverpool, UK, July 16-18, 2018.
2. A. Pownuk and V. Kreinovich, Why Unexpectedly Positive Experiences Make Decision Makers More Optimistic: An Explanation, *Proceedings of the 10th International Workshop on Constraint Programming and Decision Making CoProd'2017*, El Paso, Texas, November 3, 2017, pp. 33-37.

3. A. Pownuk and V. Kreinovich, Which Value  $\tilde{x}$  Best Represents a Sample  $x_1, \dots, x_n$ : Utility-Based Approach Under Interval Uncertainty, *Proceedings of the 10th International Workshop on Constraint Programming and Decision Making CoProd'2017*, El Paso, Texas, November 3, 2017, pp. 43-47.
4. S. Kumkov, V. Kreinovich, and A. Pownuk, In System Identification, Interval (and Fuzzy) Estimates Can Lead to Much Better Accuracy than the Traditional Statistical Ones: General Algorithm and Case Study, *Proceedings of the IEEE Conference on Systems, Man, and Cybernetics SMC'2017*, Banff, Canada, October 5-8, 2017.
5. L. Dymova, P. Sevastjanov, A. Pownuk, and V. Kreinovich, Practical Need for Algebraic (Equality-Type) Solutions of Interval Equations and for Extended-Zero Solutions, *Proceedings of the 12th International Conference on Parallel Processing and Applied Mathematics PPAM'17*, Lublin, Poland, September 10-13, 2017.
6. B. J. Kubica, A. Pownuk, and V. Kreinovich, What Decision to Make In a Conflict Situation under Interval Uncertainty: Efficient Algorithms for the Hurwicz Approach, *Proceedings of the 12th International Conference on Parallel Processing and Applied Mathematics PPAM'17*, Lublin, Poland, September 10-13, 2017.
7. A. Pownuk and V. Kreinovich, Isn't Every Sufficiently Complex Logic Multi-Valued Already: Lindenbaum-Tarski Algebra and Fuzzy logic Are Both Particular Cases of the Same Idea, *Proceedings of the Joint 17th Congress of International Fuzzy Systems Association and 9th International Conference on Soft Computing and Intelligent Systems*, Otsu, Japan, June 27-30, 2017.

Goud Ramunigari, Application of order-preserving functions to the modelling of computational mechanics problems with uncertainty, *Abstracts of the 13th GAMM - IMACS International Symposium on Scientific Computing, Computer Arithmetic, and Verified Numerical Computations*, El Paso, Texas, September 29 - October 3, 2008.
38. A. Pownuk and A. Rivera, Sensitivity analysis of truss and frame structures with uncertain geometry, *Abstracts of the 3rd Joint NMSU/UTEP Workshop on Mathematics and Computer Science*, New Mexico State University, Las Cruces, New Mexico, April 26, 2008.
39. A. Pownuk, General Interval FEM Program Based on Sensitivity Analysis Method, *Abstracts of the 2nd Joint UTEP/NMSU Workshop on Mathematics and Computer Science*, El Paso, Texas, November 17, 2007.
40. A. Pownuk, Numerical solution of FEM equations with uncertain functional parameters, *Abstracts of the Conference FEMTEC*, El Paso, TX, December 11-15, 2006.
41. I. Skalna, M.V. Rama Rao, and A. Pownuk, Systems of fuzzy equations in structural mechanics, *Abstracts of the FEMTEC*, El Paso, TX, December 11-15, 2006.
42. M. Betkowski and A. Pownuk, Applications of the fuzzy algebra for predicting of the financial risk in civil engineering projects (in Polish), *Abstracts of the Scientific Conference "Polish Civil Engineering One Year*

- After Accession of Poland to the European Union*", Gdansk, Poland, 9-11 June, 2005.
43. M. Betkowski and A. Pownuk, Concept of the random variable with fuzzy parameters and their applications for estimation of the financial risk of civil engineering projects (in Polish), *Abstracts of the Scientific Conference "Polish Civil Engineering One Year After Accession of Poland to the European Union"*, Gdansk, Poland, 9-11 June, 2005.
  44. M. Betkowski and A. Pownuk, Estimation of the financial risk of civil engineering project by using fuzzy random variables and Monte Carlo Simulations (in Polish), *Abstracts of the Scientific Conference "Polish Civil Engineering One Year After Accession of Poland to the European Union"*, Gdansk, Poland, 9-11 June, 2005.
  45. A. Pownuk, Worst case finite element computations, Abstracts of the COCONUT meeting, University of Vienna, Vienna, Austria, 14-16 April, 2003.
  46. A. Pownuk, Numerical solutions of fuzzy partial differential equations and its application in computational mechanics, *Abstracts of the Workshop on Assessment and New Directions for Research, Fuzzy Partial Differential Equations, Fuzzy Relational Equations, Fuzzy Difference Equations*. BISC Program, University of California-Berkeley, California, USA, March 15-17, 2002.
  47. A. Pownuk, Modeling of structures with taking into account uncertainty of the parameters. *Abstracts of the XLI Symposium Modeling in Mechanics*, Poland, 2002.
  48. A. Pownuk, Reliability of structures with fuzzy parameters (in Polish). *Abstracts of the XL Symposium Modeling in Mechanics*, Poland, 205-206, 19-23 February, 2001.
  49. A. Pownuk, New inclusion functions in the interval global optimization (in Polish), *Abstracts of the XL Symposium Modeling in Mechanics*, Poland, 207-208, 19-23 February, 2001.
  50. A. Pownuk, New inclusion functions in interval global optimization of engineering structures, *Abstracts of the European Conference on Computational Mechanics*, Cracow, 460-461, 26-29 June, 2001.
  51. A. Pownuk, Design of systems with uncertain parameters (in Polish), *Abstracts of the Symposium Durability of Structures, Kamien Slaski, Poland*, 14-15, 2-3 July, 2001.
  52. A. Pownuk, Applications of regular interval Jacobian matrices for modeling of mechanical structures with the interval parameters (in Polish), *Abstracts of the XXXIX Symposium Modeling in Mechanics*, Wisla, Poland, 269-270, 2000.

53. A. Pownuk, Calculation of reliability of structures using fuzzy sets theory, *Abstracts of the 32nd Symposium on Mathematical Physics with special session "Symmetries in Nonlinear Systems"*, Torun, Poland, June 6-10, 2000.
54. A. Pownuk, Calculation of displacement in elastic and elastic-plastic structures with interval parameters, *Abstracts of the 33rd Solid Mechanics Conference (SolMech2000)*, Zakopane, Poland, 160-161, 5-9 September, 2000.
55. A. Pownuk, Applications of sensitivity analysis for modeling of structures with uncertain parameters, *Abstracts of the International Conference on Interval Methods in Science and Engineering "Interval'2000"*, Karlsruhe, Germany, 116-117, 2000.
56. M. Jasinski and A. Pownuk, Modeling of Heat Transfer in Biological Tissue by Interval FEM, *Abstracts of the 14th Polish Conference on Computer Methods in Mechanics (PCCMM'99)*, Rzeszow, Poland, 127-128, May 26-29, 1999.
57. A. Pownuk, Optimization of Mechanical Structures using Interval Analysis, *14th Polish Conference on Computer Methods in Mechanics (PCCMM'99)*, Rzeszow, Poland, May 26-29, 301-302, 1999.
58. A. Pownuk, Applications of Regular Interval Jacobian Matrices to Calculation Extreme Values of Mechanical Quantities, *Abstracts of the Workshop Reliable Computations and Interval Algebra*, Sozopol, Bulgaria, September 27-29, 1999.

## 15 Invited Talks

1. *Automated solution of equations with uncertain parameters*, University of Nevada, Reno, Nevada, USA, 04/12/2012.
2. *Modeling of Uncertainty in Computational Mechanics, Presentation for REU Summer Site in Applied Intelligent Systems*, The University of Texas at El Paso, El Paso, Texas, USA, 07/02/2010.
3. *Modeling of Uncertainty in Computational Mechanics, Presentation for Computational Science Ph.D. students*, The University of Texas at El Paso, El Paso, Texas, USA, 04/22/2010.
4. *Overview of the Methods of Solution for the Equations with the Interval Parameters and its Applications in Structural Mechanics*, The University of Texas at El Paso, El Paso, Texas, USA, 09/11/2009.

5. *General Interval FEM Program Based on Sensitivity Analysis Method*, The University of Texas at El Paso, El Paso, Texas, USA, 09/07/2007.
6. *Coordinate free numerics*, The University of Texas at El Paso, El Paso, Texas, USA, 08/09/2006.
7. *Mathematical modeling of uncertainty in computational mechanics*, The University of Texas at El Paso, El Paso, Texas, USA, 07/03/2006.
8. *Mathematical basis of the design of structures with uncertain parameters*, University of Vienna, Vienna, Austria, 10/03/2003.
9. *Applications of the theory of fuzzy sets for estimation of reliability of civil engineering structures* (in Polish), Institute of Fundamental Technological Research Polish Academy of Sciences, Warsaw, Poland, 05/10/2001.
10. *Applications of Interval Analysis in Mechanics*, Brno University of Technology, Brno, Czech Republic, 07/20/1999.
11. *Applications of the interval global optimization for estimation of extreme values of mechanical quantities* (in Polish), Institute of Fundamental Technological Research Polish Academy of Sciences, Warsaw, Poland, 12/04/1997.
12. *Methods for solutions of the system of interval equations and their applications in mechanics* (in Polish), Institute of Fundamental Technological Research Polish Academy of Sciences, Warsaw, Poland, 01/23/1997.

## 16 Other Scientific Activity

1. *Modeling of Uncertainty in Computational Mechanics*, Poster Session, Sandia National Lab, Albuquerque, New Mexico, USA, 01/12/2016.
2. *Confidential Presentation for Chevron Inc.* , Chevron Inc., Houston, Texas, USA, 01/11/2012.
3. *Application of Fuzzy Sets Theory to Assessment of Reliability of Civil Engineering Structures*, Presentation, Institute of Theoretical Mechanics, Silesian University of Technology, Gliwice, Poland, 05/28/2001.

## 17 Thesis Supervising

1. Kiran Katta, PhD. dissertation, Computational Science Ph.D. Program, dissertation defense 07/23/2012, member of the Ph.D. committee.
2. Luis Basurto, PhD. dissertation, Computational Science Ph.D. Program, dissertation defense 12/20/2012, member of the Ph.D. committee.
3. Marco Olguin, PhD. dissertation, Computational Science Ph.D. Program, dissertation defense 12/20/2012, member of the Ph.D. committee.
4. Brenda Medina, Master's thesis, Mathematics, thesis defense 12/07/2011, chair of the committee.
5. Kiran Katta, Master's thesis, Computational Science Program, thesis defense 06/10/2011, member of the committee.

## 18 Undergraduate Student Contracts

1. Spring 2018 - Delilah Knapp - Selected Problems in Optimization
2. Fall 2017 - Abugalyon Yasmeen - Limits of the function with one variable.
3. Fall 2016 - Hernandez Nayely - Applications of derivatives.
4. Fall 2016 - Tellez Alan - Statistical methods in Economy.
5. Fall 2016 - Katherine Cobb - Combinatorics.
6. Spring 2016 - Velasco Victor - Applications of Integration
7. Fall 2010 - Deborah Martinez - Correlation matrix.
8. Summer 2008 - Marcela Mendoza - Optimization of truss structures.
9. Fall 2008 - Peregrino Edgardo - Complex numbers.
10. Spring 2007 - Alfredo Riveira - Truss structures with uncertain parameters.

## 19 Individual Students

1. Fall 2019 - MATH 4399 - Jose Gonzales - Machine learning and autonomous computational methods.
2. Spring 2019 - MATH 4399 - Yi, Hyung Kyung S - Machine learning.
3. Fall 2018 - MATH 4399 - Marroquin-Sandoval, Adrian - Parallel computing and machine learning.
4. Fall 2018 - MATH 4399 - Edwin Torres - Numerical analysis and machine learning.

5. Spring 2011 - MATH 4399 - Casillas, Ruben A. - Visualizations.
6. Spring 2010 - MATH 5370 - Falcon, Fernando - Numerical analysis.
7. Fall 2010 - MATH 4399- Canales, Diego A. - Financial mathematics.
8. Fall 2010 - MATH 4399 - Chavez, Ana E. - Web applications in education.
9. Fall 2010 - MATH 4399 - Alonso, Jorge I. - Parallel computing.
10. Spring 2009 - Math 4399 - Garcia, Monica - Shape optimization.
11. Fall 2009 - Math 4399 - Arriaga, Richard W. - Shape optimization.
12. Fall 2009 - MATH 4370 - Ramunigari, Naveen G. - Math Software and Web Computing
13. Fall 2008 - Math 4399 - Monica Ortiz - Shape optimization.

## 20 Professional Activities/Membership

- 2017-present – member of the Editorial board/Review committee of the International Journal of Research Innovations in Civil Engineering.
- 2006-present – scientific and educational allocations on parallel computers at the Texas Advanced Computing Center (TACC) and Extreme Science and Engineering Discovery Environment (XSEDE).
- 2016-2018 – treasurer in the SIAM student’s organization at the University of Texas at El Paso.
- 2016-present – Member of Society for Industrial and Applied Mathematics (SIAM).
- Referee for the following journals: Optimization and Engineering, Information Science, Journal of Intelligent and Fuzzy Systems, Journal Computational and Applied Mathematics, Information Science, Fuzzy Sets and System, Engineering Structures.
- Member of the Scientific Committee of The Forth Workshop on Reliable Engineering Computing, Brno University of Technology in Brno, Czech Republic, June 13-15, 2012.
- Member of the Organizational Committee of 11th Joint NMSU/UTEP Workshop on Mathematics, Computer Science, and Computational Sciences, New Mexico State University, Las Cruces, New Mexico, Saturday, March 21, 2012.

- Member of the Organizational Committee of 10th Joint UTEP/NMSU Workshop on Mathematics, Computer Science, and Computational Sciences, University of Texas at El Paso, El Paso, Texas, Saturday, November 5, 2011.
- Member of the Organizational Committee of 9th Joint NMSU/UTEP Workshop on Mathematics, Computer Science, and Computational Sciences, New Mexico State University, Las Cruces, New Mexico, Saturday, April 2nd, 2011.
- Member of the Organizational Committee of 8th Joint UTEP/NMSU Workshop on Mathematics, Computer Science, and Computational Sciences, University of Texas at El Paso, El Paso, Texas, Saturday, November 13, 2010.
- Member of the Organizational Committee of 7th Joint NMSU/UTEP Workshop on Mathematics, Computer Science, and Computational Sciences, New Mexico State University, Las Cruces, New Mexico, Saturday, April 3, 2010.
- Member of the Organizational Committee of 6th Joint UTEP/NMSU Workshop on Mathematics, Computer Science, and Computational Sciences, University of Texas at El Paso, El Paso, Texas, Saturday, November 7, 2009.
- Member of the Organizational Committee of 5th Joint NMSU/UTEP Workshop on Mathematics, Computer Science, and Computational Sciences, New Mexico State University, Las Cruces, New Mexico, Saturday, April 4, 2009.
- Member of the Organizational Committee of 4th Joint UTEP/NMSU Workshop on Mathematics, Computer Science, and Computational Sciences, University of Texas at El Paso, El Paso, Texas, Saturday, November 8, 2008.
- Member of the Organizational Committee of 3th Joint NMSU/UTEP Workshop on Mathematics, Computer Science, and Computational Sciences, New Mexico State University, Las Cruces, New Mexico, Saturday, April 26, 2008.
- Member of the Organizational Committee of 2th Joint UTEP/NMSU Workshop on Mathematics, Computer Science, and Computational Sciences, University of Texas at El Paso, El Paso, Texas, Saturday, November 17, 2007.
- Member of the Scientific Committee of The Forth Workshop on Reliable Engineering Computing National University of Singapore, March 3-5, 2010.

- Cooperation with Microsoft in the framework of The Microsoft HPC++ CompFin Lab (2008-2010).
- Member of the Program Committee of the Third International Symposium on Imprecise Probabilities and Their Applications ISIPTA '03 and ISIPTA'05.
- Member of the Local Organization Committee of the conference FEMTEC 2006 at the University of Texas at El Paso, December 11-15, 2006.
- Member of the Local Organization Committee of the conference FEMTEC 2009. Granlibakken Conference Center, Lake Tahoe, January 5-9, 2009.
- Member of the Scientific Committee of The Third Workshop on Reliable Engineering Computing Georgia Institute of Technology, February 20-22, 2008, Savannah, GA, USA.
- Former Member of the International Association for Shell and Special Structures (IASS).
- Collaborator of the Qualitative Analysis Group at the Institute of Fundamental Technological Research, Polish Academy of Sciences, Warsaw, Poland.

## 21 Sample Educational and Commercial Software

- Numerical of solution of torsion problem of prismatic bars with non-circular cross-section using FEM method (PASCAL). Part of my first MS/BS Thesis.
- Solution of truss, frame, and 2D elasticity problem with interval parameters using FEM method and sensitivity analysis (C++). Reseach Software.
- Numerical solution of slightly compressible flow equation with uncertain parameters for Chevron Oil Company (C++). Reseach software.
- c2dag converter (C++). This program converts a function written in C to an expression represented as directed acyclic graph.
- Commercial FEM program for modeling of frame structures for Specud Company (C++).
- System for on-line grading of student's homework (Asp.net, WebForms, C#, ADO.NET, Microsoft SQL Server Express 2008, Latex equations, custom users controls, and user controls, automated e-mail reports).

- Parallel solution of system of nonlinear equations and visualization of fractals (C++, MPICH2, MATLAB, VTK). Educational software.
- Self-adaptive and self-learning system for solving selected abstract mathematical problems.

## 22 Software Related Activity and Skills

- Webmaster for the Institute of Theoretical Mechanics.
- Server administrator (Linux, Windows Server).
- Cloud computing technology (Amazon AWS, Windows Azure).
- Mathematical software (Mathematica, Matlab, Scilab, Octave, Maxima, R, Minitab).
- Numerical libraries (BLAS, LAPACK, ATLAS, Intel MKL, GSL Library, IMSL Numerical Libraries, PETSc, ScaLAPACK, Kokkos).
- Machine learning (TensorFlow, Keras, ML.NET).
- Engineering software (ANSYS, ABACUS, NASTRAN).
- Database system (MS SQL Server, MySQL, MS Access, Excel).
- Computer languages (C, C++, FORTRAN, Java, Java Script, C#, VB, Asp.Net, PHP, SQL, Pascal, Delphi, Python, XML, Bash, Windows PowerShell). I am familiar with Assembler, Lisp, F#, Scheme, and Hascal. I developed many domain specific scripting languages which I use in my software.
- Parallel programming (MPI, OpenMP, POSIX Threads, Nvidia CUDA, Intel Cilk, Kokkos, System.Threading in C#).

## 23 Teaching at the University of Texas at El Paso (2006-present)

### 23.1 Graduate Classes

- Mathematical and Computer Modeling, CPS 5310.
  - D. Kiryanov and Kiryanova, Computational Science, Infinity Science Press LCC, 2007.
  - D.P. Bertsekas and J.N. Tsitsiklis, Parallel and Distributed Computation: Numerical Methods, Prentice Hall 1989.

- Spring 2010, Seminar, MATH 5370, Geometry and Calculus.
  - Z. Usiskin, A.L. Peressini, E. Marchisotto, and D. Stanley, *Mathematics for High School Teachers- An Advanced Perspective*, Pearson 2002.
- Fall 2009, Seminar, MATH 5370, Geometry and Calculus.

- Z. Usiskin, A.L. Peressini, E. Marchisotto, and D. Stanley, Mathematics for High School Teachers - An Advanced Perspective, Pearson 2002.

## 23.2 Undergraduate Classes

- Fall 2020, Individual Studies in Mathematics, MATH 4399, Artificial Intelligence, Machine Learning and Reinforcement Learning.
  - C. Szepesvári, Algorithms for Reinforcement Learning, Morgan & Claypool Publishers 2009.
  - Richard S. Sutton and Andrew G Barto, Reinforcement Learning: An Introduction, A Bradford Book, 2018.
  - CS 230 Deep Learning Lectures, Stanford Engineering, online class.
  - Stanford CS 234, Reinforcement Learning, online class.
  - MIT Introduction to Deep Learning 6.S191, online class.
  - UCL Course on Reinforcement Learning, DeepMind, online class.
  - Self-Afaptive Computational Methods (based on my research).
- Spring 2020, Individual Studies in Mathematics, MATH 4399, Artificial Intelligence, Machine Learning, and Reinforcement Learning.
  - Dan Simovici, Mathematical Analysis for Machine Learning and Data Mining, World Scientific Publishing Company, 2018.
  - C. Bishop, Pattern Recognition and Machine Learning, Springer 2006.
  - Andrew Ng, Machine Learning, online class.
  - Stanford CS 234, Reinforcement Learning, online class.
  - MIT Introduction to Deep Learning 6.S191, online class.
  - UCL Course on Reinforcement Learning, DeepMind, online class.
  - Self-Afaptive Computational Methods (based on my research).
- Fall 2019, Individual Studies in Mathematics, MATH 4399, Artificial Intelligence and Machine Learning.
  - Dan Simovici, Mathematical Analysis for Machine Learning and Data Mining, World Scientific Publishing Company, 2018.
  - C. Bishop, Pattern Recognition and Machine Learning, Springer 2006.
  - Andrew Ng, Machine Learning, online class.
  - Self-Afaptive Computational Methods (based on my research).
- Spring 2019, Individual Studies in Mathematics, MATH 4399, Artificial Intelligence and Machine Learning.

- Dan Simovici, *Mathematical Analysis for Machine Learning and Data Mining*, World Scientific Publishing Company, 2018.
- C. Bishop, *Pattern Recognition and Machine Learning*, Springer 2006.
- Andrew Ng, *Machine Learning*, online class.
- Self-Adaptive Computational Methods (based on my research).
- Fall 2018, Individual Studies in Mathematics, MATH 4399, Parallel Computing and Machine Learning.
  - Andrew Ng, *Machine Learning Yearning*, free draft copy from <http://www.mlyearning.org>
  - Andrew Ng, *Machine Learning*, online class.
  - W. Gropp, E. Lusk, and A. Skjellum, *Using MPI*, 3rd Edition, MIT Press, 2014.
  - W. Gropp, T. Hoefler, R. Thakur, and E. Lusk, *Using Advanced MPI*, MIT Press, 2014.
  - B. Chapman, G. Jost, R. van der Pas, W. Gropp, and E. Lusk, *Using OpenMP: Portable Shared Memory Parallel Programming (Scientific and Engineering Computation)*, Scientific and Engineering Edition, The MIT Press 2007.
- Fall 2018, Individual Studies in Mathematics, MATH 4399, Numerical Analysis and Machine Learning.
  - C. Bishop, *Pattern Recognition and Machine Learning*, Springer 2006.
  - D. Kincaid and W. Cheney, *Numerical Analysis: Mathematics of Scientific Computing*, American Mathematical Society, 2002.
- Spring 2011, Individual Studies in Mathematics, MATH 4399.
  - N. Matloff, *The Art of R Programming: A Tour of Statistical Software Design*, No Starch Press 2011.
  - C. Bishop, *Pattern Recognition and Machine Learning*, Springer 2006.
  - M. Lutz, *Programming Python*, Edition 3, O’Reilly Media, Inc. 2006.
  - J. Kepner, *Parallel MATLAB for Multicore and Multinode Computers (Software, Environments and Tools)*, Society for Industrial and Applied Mathematics 2009.
- Fall 2010, Individual Studies in Mathematics, MATH 4399.
  - P.G. Ciarlet, *The Finite Element Method for Elliptic Problems*, SIAM: Society for Industrial and Applied Mathematics 2002.
  - O.C. Zienkiewicz, R.L Taylor, and J.Z. Zhu, *The Finite Element Method: Its Basis and Fundamentals*, 6th Edition, Butterworth-Heinemann 2005.

## 24 Teaching at the Silesian University of Technology (1995-2005), Poland

### 24.1 Graduate Classes

- Theory of Elasticity
  - Cz. Rymarz, Continuum Mechanics, Polish Scientific Publisher (PWN), Warsaw 1995 (in Polish).
  - P.G. Ciarlet, An Introduction to Differential Geometry with Applications to Elasticity, Springer 2005.
  - S.S. Antman, Nonlinear Problems of Elasticity, Springer 1995.
  - S. Timoshenko and J.N. Goodier, Theory of Elasticity, McGraw-Hill, 1970.
  - W. Nowacki, Theory of Elasticity, Polish Scientific Publisher (PWN), Warsaw 1970 (in Polish).
  - S. Bielak, Theory of Shells, Part 1, Geometry and Physics, Publishing House of Silesian University of Technology, Gliwice 1990 (in Polish).
  - S. Bielak, Theory of Shells, Part 2, Theory and Applications, Publishing House of Silesian University of Technology, Gliwice 1988 (in Polish).

- P.G. Ciarlet, *Mathematical Elasticity, Volume 2: Theory of Plates (Studies in Mathematics and its Application)*, North Holland 1997.
- ANSYS Theory Reference, ANSYS Inc. 1999.
- Theory of Plasticity
  - L. Washizu, *Variational methods in elasticity and plasticity*, Pergamon 1975.
  - R. Hill, *The Mathematical Theory of Plasticity*, Oxford University Press 1998.
  - F. Dunne and N. Petrinic, *Introduction to computational plasticity*, Oxford University Press 2005.
  - D.R.J. Owen and E. Hinton, *Finite Elements in Plasticity, Theory and Practice*, Pineridge Press Limited 1980.
  - M. Kleiber, *Incremental Finite Element Modelling in Non-Linear Solid Mechanics*, Ellis Horwood 1989.
  - M. Kleiber and C. Wozniak, *Nonlinear Mechanics of Structures*, Springer 1991.
  - ANSYS Theory Reference, ANSYS Inc. 1999.
- Computer Methods in Civil Engineering
  - O.C. Zienkiewicz, R.L Taylor, and J.Z. Zhu, *The Finite Element Method: Its Basis and Fundamentals*, 5th Edition, Butterworth-Heinemann, 2000.
  - O.C. Zienkiewicz, R.L Taylor, and D.D. Fox, *The Finite Element Method for Solid and Structural Mechanics*, 5th Edition, Butterworth-Heinemann, 2000.
  - K. Rektorys, *Variational Methods in Mathematics, Science and Engineering*, Springer 1977.
  - M. Kleiber, *Computer Methods in the Solid Mechanics*, Polish Scientific Publisher (PWN), Warsaw 1995 (in Polish).
  - T. Burczyński, *Boundary Element Method in Mechanics*, Scientific and Technical Publisher (WNT) 1995 (in Polish).
  - K.J. Bathe, *Finite Element Procedures in Engineering Analysis*, Prentice Hall 1982.
  - P.G. Ciarlet and J.L. Lions (Editors), *Handbook of Numerical Analysis, Volume 1, Finite Difference Methods*, Elsevier 1990.
  - P.G. Ciarlet and J.L. Lions (Editors), *Handbook of Numerical Analysis, Volume 2, Finite Element Methods (Part 1)*, Elsevier 1991.
  - P.G. Ciarlet and J.L. Lions (Editors), *Handbook of Numerical Analysis, Volume 3, Techniques of Scientific Computing (Part 1), Numerical Methods for Solids (Part 1)*, Elsevier 1994.

- P.G. Ciarlet and J.L. Lions (Editors), Handbook of Numerical Analysis, Volume 4, Finite Element Methods (Part2), Numerical Methods for Solids (Part 2), Elsevier 1996.
- P.G. Ciarlet and J.L. Lions (Editors), Handbook of Numerical Analysis, Volume 5, Techniques of Scientific Computing (Part 2), Elsevier 1997.
- P.G. Ciarlet and J.L. Lions (Editors), Handbook of Numerical Analysis, Volume 6, Numerical Methods for Solids (Part 3), Numerical Methods for Fluids (Part 1), Elsevier 1998.
- P.G. Ciarlet and J.L. Lions (Editors), Handbook of Numerical Analysis, Volume 7, Solution of Equation in  $R^n$  (Part 3), Techniques of Scientific Computing (Part 3), Elsevier 2000.
- P.G. Ciarlet and J.L. Lions (Editors), Handbook of Numerical Analysis, Volume 8, Solution of Equations in  $R^n$  (Part 4), Techniques of Scientific Computing (Part4), Numerical Methods for Fluids (Part 2), Elsevier 2002.
- ANSYS Theory Reference, ANSYS Inc. 1999.

## 24.2 Undergraduate Classes

- Mathematical Methods in Civil Engineering
  - J. Jędrzejczyk-Kubik, A. Pownuk, and J. Skrzypczyk, Selected Mathematical Problems with Exercises (in Polish), Publishing House of the Silesian University of Technology, ISBN 978-83-7335-578-1, Gliwice, Poland, 2010. (book used as a lecture notes)
  - G.N. Berman, A Problem Book in Mathematical Analysis, Mir Publishers 1977.
  - B.P Demidovich, Problems in Mathematical Analysis, Gordon & Beach 1968.
- Theoretical Mechanics
  - V. I. Arnold, A. Weinstein, and K. Vogtmann, Mathematical Methods of Classical Mechanics, Springer 1980.
  - S. Borkowski, General Mechanics - Newtonian Dynamics, Publishing House of Silesian University of Technology, Gliwice 1998 (in Polish).
  - S. Borkowski, General Mechanics - Lagrangian and Hamiltonian Mechanics, Publishing House of Silesian University of Technology, Gliwice 1998 (in Polish).
  - J. Misiak, General Mechanics, Scientific and Technical Publisher (WNT), Warsaw 1999 (in Polish).
- Reliability and Safety of Structures

- J. Murzewski, Reliability of Engineering Structures, Warsaw, Arkady 1989 (in Polish).
- D. Kececioglu, Reliability Engineering Handbook, Volume 1, DEStech Publications Inc. 2002.
- M. Kleiber and T. D. Hien, The Stochastic Finite Element Method (Basic Perturbation Technique and Computer Implementation), Volume 1, Wiley 1992.
- R. Ghanem and P. D. Spanos, Stochastic Finite Elements: A Spectral Approach, Springer-Verlag, New York 1991.
- W. Feller, An Introduction to Probability Theory and its Applications, Volume I, 3rd Edition, Wiley 1968.
- Introduction to Computer Science
  - Introduction to operating systems and computer hardware.
  - MS Word, MS Excel, Autocad.
  - Programming in C/C++ and Fortran.
- Numerical Methods in Civil Engineering
  - E. Majchrzak and B. Mochnacki, Numerical Methods, Publishing House of Silesian University of Technology, 4th Edition, Gliwice 2004 (in Polish).
  - M. Jankowski and J. Jankowska, Numerical Methods, Volume 1, Scientific and Technical Publisher (WNT), Warsaw 1981 (in Polish).
  - M. Jankowski, M. Dryja, and J. Jankowska, Numerical Methods, Volume 2, Scientific and Technical Publisher (WNT), Warsaw 1982 (in Polish).
  - J.H. Mathews and K.D. Fink, Numerical Methods Using Matlab, 3th Edition, Prentice Hall 1999.
  - J.D. Hoffman, Numerical Methods for Engineers and Scientists, Marcel Dekker Inc. 2001.
- Strength of Materials
  - Z. Dylag, A. Jakubowicz, and Z. Orlos, Strength of Materials, Scientific and Technical Publisher (WNT), Warsaw 1999 (in Polish).
  - Z. Brzoska, Strength of Materials, Scientific and Technical Publisher (WNT), Warsaw 1980 (in Polish).
  - P. Jastrzebowski, J. Mutermilch, and W. Orłowski, Strength of Materials, Scientific and Technical Publisher (WNT), Arkady 1986 (in Polish).
- Statistics for Civil Engineers

- H. Jasiulewicz and W. Kordecki, Probability Theory and Mathematical Statistics - Examples and Exercises, GIS 2002 (in Polish).
- W. Feller, An Introduction to Probability Theory and its Applications, Volume I, 3rd Edition, Wiley 1968.

## 25 Service at the University of Texas at El Paso

- 2010-present Undergraduate Advisor.
  - orientations for new students
  - credit transfers
  - career advising
  - selection of courses
- 2009-2010 I was scheduling colloquia at the Department of Mathematical Sciences.
- 2007-2009 Hiring Lecturers Committee.
- 2008-2009 Graduate Recruiting Committee,
- 2007-2008 Student Competitions Committee.
- 2008 Undergraduate Core Curriculum Committee.
- 2007 Graduate Recruiting Committee.
- 2006 Undergraduate Recruitment Committee.

## 26 Service at Silesian University of Technology

- 1995-2005 Qualifying Exam Committee.
- 1999-2001 Service for the Library.
- 1997-1999 Scheduling of classes for the Department of Civil Engineering.
- 1995-2006 Website and network administrator for the Institute of Theoretical Mechanics.

## 27 Languages

- English
- Polish
- Spanish - basic,
- German - basic.
